

## RBN Exploit - IP Addresses (1)

Just so you know your enemy, our good friends the RBN (Russian Business Network) - now widening their business to "bullet proof" hosting of MPack (diy exploiters) - if you try and complain to Nevacon, do not expect a reply ;- ) - I keep wondering why the international community cannot do something about this? - WE seem more inclined to blame China or Russia as countries. Just so we now 4/5 times more spam & exploits are from USA hostings then China:

Add all below to your IP banned list on your hosts / servers, another 300+ RBN IPs to go with these :-)
